Meeting was held to discuss collaboration in taking the IECE program to Madisonville and Henderson.

- We discussed the CDI 340 and CDI 550 courses that are a part of the undergraduate program for IECE majors.

  It was decided that I (Jo) would teach CDI 550 this summer by ITV and that the class would be open to all majors for whom it is required. CDI majors would be encouraged to take the course in the fall but would be allowed to enroll in the summer if needed.

- CDI faculty will help us identify a speech pathologist with a master’s degree in CDI in the Madisonville or Henderson area who could teach the CDI 340 course. Pearl will work with us in developing training and resource materials for the adjunct faculty person teaching this class.

- We also discussed need to offer information about speech and language development as part of the IECE graduate program. As the CDI faculty work toward curriculum changes, we will stay in touch to determine if Pearl might be able to teach a graduate seminar in speech and language development that would be offered every 18 months. In order to provide access to information about speech and language development now, it was suggested that we try to offer a Saturday seminar.

Let me know if I have not captured our discussion.
